# How The Joint Staff Uses the *DecisionLens* Decision Support Tool

**Dennis M. Savage**

**16 March 2017**

**As a DoD employee, I want to be clear that my views are my personal opinion and not that of the Joint Chiefs of Staff; the Chairman, Joint Chiefs of Staff; or, the Joint Staff**

**My views presented herein and through discussion are mine alone and do not necessarily represent the views of the Department of Defense or its Components**

- **Common to all—evaluating, assessing, and rating:**
  - Future years' Program initiatives
  - Unfinanced requirements
- **Tailored decision criteria:**
  - Relevant and ratable
  - Mutually exclusive and exhaustive criteria
  - Weighted before evaluating initiatives
- **Optimizing available funding authority**

## *Other Joint Staff Uses*

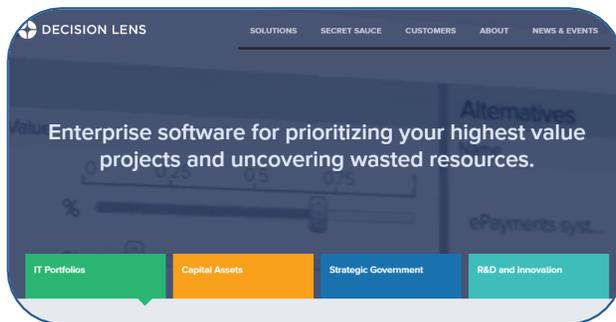

- **Strategy development**
- **Global force operational opportunities and risks**
- **Logistical investments in Joint capabilities**
- **Optimal National Guard and Reserves Joint Staff mix**
- **Commercial offerors' technical proposals**

- **Decision support tools like *DecisionLens* tend to be more objective than a BOGSAT. Also, they...**
  - Are less manual intensive than other ways and means
  - Provide structure and discipline for trade-off discussions and ratings
  - Enable organizations to leverage past evaluations and ratings when considering future initiatives
- **All decision support tools' use require thought, an understanding of how the tools work, organization, socialization, time, and energy to use properly**

# Thank You!
