

## A STRATEGIC SOLUTION FOR CONTINUOUS PLANNING

Decision Lens empowers informed decisions that enable your organization to maximize on its goals. By providing contextual insights and actionable options at the right stage of the planning process, Decision Lens saves organizations countless hours and dollars while simultaneously providing the optimal value for your investments.

“Companies need to first imagine possibilities and second, pick the one for which the most compelling argument can be made. In deciding which is backed by the most compelling argument, they should indeed take into account all data that can be crunched. But in addition, they should use qualitative judgement.”

—HBR article: [Planning Doesn't Have to Be the Enemy of Agile](#) Sept. 13, 2018

## DELIVERING THE COMPLETE PROCESS • CREATING THE INTELLIGENT PORTFOLIO<sup>SM</sup>

**MANAGE** Effortless management and maintenance of data and key contributors is the solid base our methodology is built on. Gain control of your data by integrating it in one intuitive and familiar interface, with accessibility and edit permissions as well as revision logs, for a collaborative and instantaneously flexible framework.

**UNDERSTAND** Users have the option to either manually create and explore different resourcing and timing scenarios, or can also leverage advanced algorithms to provide data driven recommendations and contextual insights that align priorities, dependencies and restrictions with goals and targets.

**DECIDE** Compare options and “what-if” scenarios side by side to quickly identify tradeoffs and ripple effects. Put baseline and “what-if” options against one another to uncover performance gains or losses for effective decision making. See what projects made the cut, and which ones are out.

**COMMUNICATE** Quick, effective communication is key to moving forward. Support and defend decisions with data-backed and contextually broken-down options, as well as visually impactful graphs and charts; all using leading AI and Natural Language Processing methodology.
